Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In response to the remarks filed on March 12, 2007. The following action is taken:

The claims are rejected for the same reasons set forth in the previous office action repeated herein.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoshino et al (5438582).

The reference shows a laser output monitoring apparatus in an optical disk recording device comprising: a light source LD, a write strategy generating signal (modulated write signal) column 5 lines 51-64, detecting and correcting an overshoot and undershoot of the laser output column 7 lines 50-65 by monitoring the laser source.

With respect to the limitations of claims 2 and 10 see column 9 line 59 to column 10 line 21.

Claims 3-8, 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the cited prior art shows the use of a correction signal generating unit having the process or the elements as claimed.

Art Unit: 2627

Applicant's arguments filed March 12, 2007 have been fully considered but they are not persuasive. In response to applicant's arguments not showing each of the claimed limitations. The examiner disagree with the applicant's arguments that the reference shows the correction of the monitoring signal as opposed to the correction of laser source as claimed. Applicant's attention is drawn to column 7 lines 1-20, the reference shows a difference signal (tilt) is detected. The difference signal is outputted as a write power correction signal to the laser drive circuit (laser source) meeting the claimed invention.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to NABIL Z. HINDI at telephone number (571) 272-7618.
